this book is the result of three symposia of the dutch society for landscape ecology the first symposium in 2005 was about the national ecological network in the netherlands the reason was that the implementation of the nen decided upon in 1990 was halfway the second symposium in 2006 was about urban ecology and the third one to be held in 2007 will be about civil infrastructure this book does not cover the conferences completely and new contributions are added the three themes are important contexts in which landscape ecologists do their research and apply their knowledge and skills of course there are many more subjects to hold conferences about for example climate change urbanisation agriculture landscape ecology itself etc the focus of the conferences is on the netherlands with its urbanisation intensive land use and water management as characteristic features although many wlo members do their work abroad or in an international context these conferences offer a window on what happens in the dutch context the experiences may be of value for other contexts and that is why we present the results in english the selected themes and

the focus on the dutch context are serious demarcations of what landscape ecology in the netherlands is all about the book does not represent all research and applications of landscape ecology

systemic lupus erythematosus sle commonly called lupus is a chronic autoimmune disorder that can affect virtually any organ of the body in lupus the body s immune system which normally functions to protect against foreign invaders becomes hyperactive forming antibodies that attack normal tissues and organs including the skin joints kidneys brain heart lungs and blood lupus is characterized by periods of illness called flares and periods of wellness or remission because its symptoms come and go and mimic those of other diseases lupus is difficult to diagnose there is no single laboratory test that can definitively prove that a person has the complex illness to date lupus has no known cause or cure early detection and treatment are the key to a better health outcome and can usually lessen the progression and severity of the disease anti inflammatory drugs antimalarials and steroids such as cortisone and others are often used to treat lupus cytotoxic chemotherapies like those used in the treatment of cancer are also used to suppress the immune system in lupus patients a new edition of this established and well regarded reference combines basic science with clinical science to provide a translational medicine model systemic lupus erythematosus sixth edition is a useful reference for specialists in the diagnosis and management of patients with sle a tool for measurement of clinical activity for pharmaceutical development and basic research of the disease and a reference work for hospital libraries completely updated revised and expanded with the most comprehensive and accessible reference on sle for clinicians and scientists full color presentation throughout the book provides the latest information available on diagnosis and treatment incorporates an international panel of authors who are experts in their fields with an emphasis on young cutting edge scientists and physicians
