this comprehensive and uniquely organized text is aimed at undergraduate and graduate level statistics courses in education psychology and other social sciences a conceptual approach built around common issues and problems rather than statistical techniques allows students to understand the conceptual nature of statistical procedures and to focus more on cases and examples

of analysis wherever possible presentations contain explanations of the underlying reasons behind a technique importantly this is one of the first statistics texts in the social sciences using r as the principal statistical package key features include the following conceptual focus the focus throughout is more on conceptual understanding and attainment of statistical literacy and thinking than on learning a set of tools and procedures problems and cases chapters and sections open with examples of situations related to the forthcoming issues and major sections ends with a case study for example after the section on describing relationships between variables there is a worked case that demonstrates the analyses presents computer output and leads the student through an interpretation of that output continuity of examples a master data set containing nearly all of the data used in the book s examples is introduced at the beginning of the text this ensures continuity in the examples used across the text companion website a companion website contains instructions on how to use r sas and spss to solve the end of chapter exercises and offers additional exercises field tested the manuscript has been field tested for three years at two leading institutions

intended for users of stata who do not have a strong background in statistics or any experience of other statistical software packages

research is a vital and often daunting component of many counselling and psychotherapy courses as well as completing their own research projects trainees across modalities must understand the research in the field what it tells them and how to do it breaking down this seemingly mountainous task into easy to swallow pieces this book will navigate your students through each stage of the research process from choosing a research question through the pros and cons of different methods to data analysis and writing up their findings written by leading contributors from the field including john mcleod mick cooper and tim bond each chapter features points for reflection engaging activities and suggestions for further reading helping students to engage with all aspects of research an original graphic narrative runs throughout the book bringing this complex topic to life in a unique way whether embarking on research for the first time or already a little familiar with research and research methods this unique guide is something counselling and psychotherapy students will turn to continually throughout their research projects
